RIJKSUNIVERSITEIT GRONINGEN

# The Opacity of Spiral Galaxy Disks

## PROEFSCHRIFT

ter verkrijging van het doctoraat in de  
Wiskunde en Natuurwetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. F. Zwarts,  
in het openbaar te verdedigen op  
maandag 17 Juni 2005  
om 13.15 uur

door

**Benne Willem Holwerda**

geboren op 24 December 1976  
te Nijmegen

<b>Acknowledgements</b>	<b>IX</b>
<b>Nederlandse Samenvatting</b>	<b>XI</b>
<b>English Summary</b>	<b>XIX</b>
<b>1 Introduction:</b>	
<b>The dust content of spiral galaxies</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 The importance of dust . . . . .	3
1.3 Inclination effects on disks . . . . .	3
1.3.1 The Holmberg test . . . . .	4
1.3.2 Sample selection effects . . . . .	4
1.4 Characterizing dust from stellar emission . . . . .	5
1.4.1 Dust and disk kinematics . . . . .	5
1.4.2 Light models . . . . .	5
1.5 Spectral energy distribution models . . . . .	6
1.6 Dust emission . . . . .	9
1.6.1 Dust composition from emission . . . . .	10
1.7 Direct extinction measurements . . . . .	10
1.7.1 Occulting galaxies . . . . .	10
1.7.2 Counts of distant galaxies . . . . .	12
1.7.3 Calibrated Counts . . . . .	16
1.8 Motivation of this thesis. . . . .	17
<b>2 Automating the “Synthetic Field Method”</b>	<b>19</b>
2.1 Introduction . . . . .	20
2.2 The Synthetic Field Method . . . . .	22
2.2.1 Limits of the Synthetic Field Method . . . . .	22
2.3 Automation of the method . . . . .	22
2.3.1 Processing archival WFPC2 data . . . . .	23
2.3.2 Making object catalogs . . . . .	24
2.3.3 Selection of field galaxy candidates using “fuzzy boundaries” . . . . .	25

2.3.4	Visual identification of contaminants . . . . .	29
2.4	Improvements in the “Synthetic Field Method” . . . . .	31
2.4.1	Foreground galaxy segmentation . . . . .	31
2.4.2	Simulated fields . . . . .	32
2.4.3	Field galaxy numbers: uncertainties and systematics . . . . .	33
2.4.4	Inclination correction . . . . .	36
2.5	Examples: NGC 4536 and NGC 1365 . . . . .	36
2.5.1	NGC 4536, comparing observers . . . . .	37
2.5.2	NGC 1365: arm and inter-arm extinction . . . . .	39
2.5.3	NGC 4536 and NGC 1365: Radial profile of extinction . . . . .	40
2.5.4	Surface brightness . . . . .	43
2.6	Conclusions . . . . .	45
<b>3</b>	<b>Radial Extinction Profiles</b>	<b>47</b>
3.1	Introduction . . . . .	48
3.2	The HST Archive Sample . . . . .	49
3.3	SFM: Calibrating the field galaxy numbers. . . . .	50
3.3.1	Galactic Extinction . . . . .	53
3.4	Radial opacity measurements in individual WFPC2 fields . . . . .	54
3.5	Average Radial Opacity Plots . . . . .	57
3.5.1	Inclination effects . . . . .	57
3.5.2	The effect of spiral arms . . . . .	62
3.5.3	Hubble Type . . . . .	69
3.6	Average color of the field galaxies . . . . .	69
3.7	Surface brightness and opacity . . . . .	74
3.8	Discussion . . . . .	74
3.9	Conclusions . . . . .	76
<b>4</b>	<b>Dust opacity, sub-mm emission and HI distributions</b>	<b>79</b>
4.1	Introduction . . . . .	80
4.2	The “Synthetic Field Method” . . . . .	81
4.3	Individual galaxies: radial HI and opacity profiles . . . . .	83
4.4	Dust-to-HI ratio . . . . .	85
4.5	Comparison to SCUBA profiles. . . . .	88
4.5.1	M51 . . . . .	89
4.5.2	Comparing to sub-mm . . . . .	89
4.6	Conclusions . . . . .	89
4.7	Future Work . . . . .	89
<b>5</b>	<b>Extinction, stellar light and color</b>	<b>91</b>
5.1	Introduction . . . . .	92
5.2	The “Synthetic Field Method” . . . . .	92
5.3	Discussion of systematic effects . . . . .	93
5.3.1	Systematics of the Synthetic Field Method . . . . .	93
5.3.2	Sample selection effects . . . . .	94
5.4	Surface brightness and disk opacity . . . . .	95

5.5	Surface brightness and opacity in arm and disk . . . . .	98
5.6	Disk opacity and NIR color . . . . .	101
5.7	Dust and light scalelengths . . . . .	102
5.8	Comparison to Cepheid Reddening . . . . .	104
5.9	Discussion: Implication for our view of a spiral disk . . . . .	106
5.10	Conclusions . . . . .	107
<b>6</b>	<b>160 <math>\mu\text{m}</math> emission and opacity</b>	<b>109</b>
6.1	Introduction . . . . .	109
6.2	MIPS scan maps and reduction . . . . .	110
6.3	Converting MIPS flux to optical depth . . . . .	111
6.4	Dust emission and extinction . . . . .	111
6.4.1	Single WFPC2 fields . . . . .	112
6.4.2	Two WFPC2 fields . . . . .	115
6.5	Discussion . . . . .	117
6.6	Concluding Remarks . . . . .	119
<b>7</b>	<b>The accuracy of galaxy counts as an extinction probe</b>	<b>121</b>
7.1	Introduction . . . . .	122
7.2	The “Synthetic Field Method” . . . . .	122
7.3	Predicted limitations using Hubble . . . . .	123
7.4	Comparison data and systematics . . . . .	124
7.5	The effects of surface brightness . . . . .	125
7.6	The effects on individual WFPC2 fields . . . . .	126
7.6.1	Distance . . . . .	127
7.6.2	Granularity . . . . .	129
7.6.3	Effects of structure and surface brightness . . . . .	131
7.7	Discussion: Optimum Distance for the SFM . . . . .	131
7.8	Conclusions . . . . .	132
7.9	Future work . . . . .	133
<b>8</b>	<b>Future work with the Synthetic Field Method</b>	<b>135</b>
8.1	Justification for more SFM analysis . . . . .	135
8.2	ACS data . . . . .	137
8.2.1	M101 . . . . .	137
8.2.2	M51 . . . . .	139
8.2.3	Object classification: the Self-Organizing Map . . . . .	140
8.3	Disk opacity mapping . . . . .	140
8.4	Concluding remarks . . . . .	142
<b>9</b>	<b>Discussion and Outlook</b>	<b>143</b>
9.1	Results from this thesis . . . . .	143
9.2	Comparison of results with earlier work . . . . .	146
9.3	Implications of the results . . . . .	147
9.3.1	Implications for our view of spiral galaxy disks . . . . .	148
9.3.2	Implication for observations of the high-redshift Universe . . . . .	149
9.4	Questions remaining... . . . .	149

<b>A</b>	<b>Observations</b>	<b>163</b>
A.1	Colour images . . . . .	163
A.2	Masks . . . . .	163
A.3	Checking basic data . . . . .	164
A.3.1	Scale radius . . . . .	164
A.3.2	Inclination . . . . .	164
<b>B</b>	<b>Systematics &amp; Uncertainties</b>	<b>199</b>
B.1	Introduction . . . . .	199
B.2	Uncertainties . . . . .	199
B.2.1	Small number Poisson error . . . . .	199
B.2.2	Clustering uncertainty . . . . .	200
B.3	Total uncertainties . . . . .	202
B.4	Systematics in the counts . . . . .	203
B.4.1	Confusion in synthetic and science fields. . . . .	203
B.4.2	Crowding . . . . .	205
B.5	How average is the HDF? . . . . .	205
B.6	Galactic extinction . . . . .	207
<b>C</b>	<b>Synthetic Dust Models</b>	<b>209</b>
